

# Grow in Kedungu Brochure

GROW International School – Kedungu is an innovative educational institution set to open in August 2025 in the serene and rapidly developing coastal village of Kedungu, Bali. As the first international school in the area, GROW aims to provide a unique blend of academic rigor and holistic development, preparing students for the challenges of the future.

## 01 Our Mission

At GROW, we believe education is not only about academic success but also personal fulfillment. We aim to equip children with essential knowledge to understand the world around them, offering high-quality education through highly qualified teachers.

## 02 Our Vision

At GROW in Kedungu, we aspire to be a leader in education, guiding children on a journey of self-discovery, growth, and a love for learning. We nurture compassionate, independent individuals who embrace diversity and make a positive impact on their communities.

### ***"Our teachers are our strength!"***

*We continually assess the skills our students need to succeed in a globalized world, supported by our team of highly qualified expat teachers.*

# Educational Philosophy

## Our Educational Philosophy

At GROW, we believe in a balanced and **forward-thinking approach to education**. Our curriculum stands on two strong pillars: academic rigor and clarity of the Cambridge framework, and the holistic, inquiry-based learning philosophy of the International Baccalaureate (IB). This combination offers our students the best of both worlds—solid academic foundations alongside opportunities to explore, question, and discover.

Learning at GROW is hands-on, concept-driven, and deeply connected to real-life experiences. Students don't just absorb knowledge; they apply it, reflect on it, and use it to build essential skills such as critical thinking, collaboration, creativity, and communication. Our goal is to prepare young learners not only to succeed in today's world, but to confidently and compassionately shape the future—both their own and the world around them.

## At GROW, We Focus on Future Skills

- 1 Languages**  
Connect with diverse cultures and opportunities.
- 2 Digital Literacy**  
Empower students to create and innovate with technology.
- 3 Critical Thinking**  
Analyze, evaluate, and solve complex problems.
- 4 Creativity**  
Foster innovation and adaptability.
- 5 Emotional Intelligence**  
Build strong relationships and manage emotions.
- 6 Cultural Competence**  
Appreciate diversity and work globally.
- 7 Lifelong Learning**  
Stay relevant by continuously acquiring new skills

# Campus and Facilities

**At GROW, joyful learning is built into every corner of our campus.**

Just minutes from the beach, our school is surrounded by nature and rooted in the vibrant Kedungu community. Designed to inspire curiosity and connection, the campus features spacious, light-filled classrooms, collaborative learning spaces, a covered sports court, lush play gardens, and an engaging animal farm.

## One of our students' favorite features?

A giant slide that takes them from the second floor straight to the playground—because fun is part of learning, too. Our canteen is bright and welcoming, offering a healthy and social space for meals.

To make daily life easier for families, our school bus service includes designated pick-up points between Umalas and Kedungu, with caring staff on board who turn each ride into an opportunity for playful, educational engagement.

# Nourishing Canteen

GROW places a strong emphasis on healthy eating, with a canteen that serves nourishing, balanced, and appealing meals. The on-site French bakery offers fresh take-away treats for parents during drop-off and pick-up times.

Students are involved in meal preparation, learning about the origins of their food, and practicing mindful eating habits. The school also grows its own vegetables, integrating gardening into the curriculum to teach sustainability and responsibility.

# After School Activities

At GROW, after-school activities are more than just fun—they're designed to shape the future. Our diverse and engaging programs help students build essential life skills in areas such as entrepreneurship, technology, languages, survival skills, creativity, arts, and sports. Unique offerings like **maintaining a farm, mud wrestling, world language classes, entrepreneurship projects, and survival classes** allow children to explore their interests and passions in meaningful ways. Each activity is crafted to be hands-on, exciting, and truly unlike anything else in the area, making learning after school just as inspiring as it is in the classroom.

## Community and Connection

Education is a shared journey. We actively invite parents to be part of school life—whether it's joining their children for our monthly community lunches or engaging in meaningful school events. Our deep commitment to sustainability and local connections runs through everything we do—from growing our own vegetables to learning with and from our surroundings.

GROW International School – Kedungu offers a forward-thinking education that blends academic excellence with holistic development in a nurturing, nature-connected setting. Nestled in the heart of Kedungu—a vibrant, fast-growing coastal community near world-class surf—we are more than a school; we are a space where young minds grow strong, confident, and ready for the future.

# Sustainability at GROW – Kedungu

01

## Eco-Friendly Facilities

Our campus features vegetable and fruit gardens, a small animal farm, and beautifully landscaped areas, promoting environmental awareness and hands-on learning.

02

## Community Engagement

We organize activities such as beach clean-ups and upcycling projects, encouraging students to take an active role in environmental preservation and community contribution.

03

## Sustainable Practices

Our cafeteria serves balanced meals made from locally sourced ingredients, supporting sustainable agriculture and fostering healthy eating habits.

04

## Green Initiatives

We prioritize sustainability with eco-friendly solutions, including sustainable bricks made from recycled fly ash, rainwater harvesting, grey water filtration, and solar panels. The school is powered by LED lighting, utilizes natural light and ventilation, and promotes efficient waste recycling to reduce our environmental footprint.
