TREHAUS SCHOOL JAKARTA

Raising Changemakers

We are Trehaus School Jakarta, a Silicon Valley-inspired preschool and daycare that is changing early education, focuses on building character and future skills, and lets parents be present for their children's learning journey.

At TREHAUS
SCHOOL, your kids
don't just learn to
count, they learn
what counts.

Unmatched
parental
proximity

Play-based and
project-based
curriculum

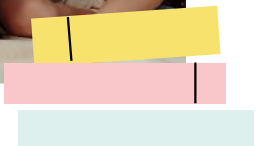

Holistic
Development

WHY CHOOSE US:

Child-centred:
Every child
has a voice

Teachers as
Co-Parents

UNIQUE CURRICULUM

1

We created a groundbreaking proprietary curriculum based on our Trehaus Method, which is designed to empower and equip children to unlock knowledge and skills to navigate the future world.

3

We focus on building character, instilling values, and developing soft skills.

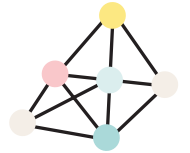

We believe education is more than just knowledge acquisition; education should evolve to focus on building integrity and strength in character, and developing creativity, empathy and grit. We believe in raising children who do not just have the answers to “What do I want to be when I grow up?” – but instead the depth to explore: “How can I contribute to make the world a better place?”

2

We are not bound by one pedagogy.

We take the best elements of research-based pedagogies and philosophies including:

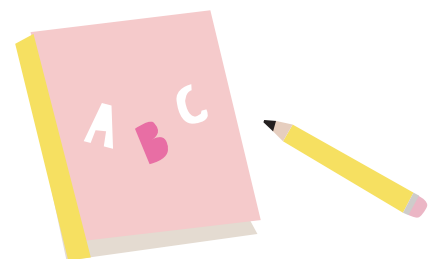

- Reggio Emilia
- Montessori
- Ecological Systems Theory
- Somatics
- Respectful Caregiving

4

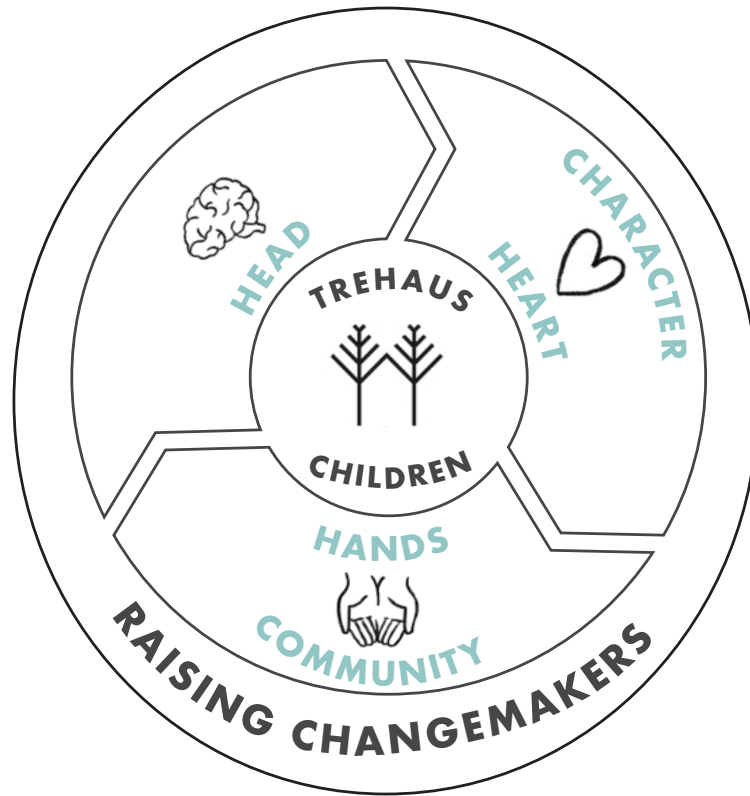

We lay strong foundation on language, literacy and numeracy.

We believe in the importance of building a strong foundation in language, communication and numeracy skills in the early years. Our bilingual programme is designed to ready your child beyond their preschool learning journey.

A HOLISTIC CURRICULUM

Our child-centred approach aims to help our students form a healthy sense of self-identity through play and discovery, with a core curriculum activating and connecting the HEAD, HEART and HANDS to create a life-long love of learning.

HOW TREHAUS CHILDREN DEVELOP

At TREHAUS SCHOOL JAKARTA, a vital aspect of our teaching pedagogy is the ability for a child to be a changemaker, ready for tomorrow. We believe that it is our mission to give Trehaus children the core skills set and qualities needed most to help them conquer the world through our core fundamentals, community connection, free play, personal and social development.

4:00	Dismissal				

Trehaus children learn from both structured and unstructured learning moments

THE LITTLE PROJECTS

Our Proprietary Trehaus curriculum comprises 6 modules inspired by the key roles of the future economy, from entrepreneurs to CEOs, and the skills that will be needed. These are instilled alongside a vigorous bilingual or language-immersion core fundamentals program (reading, writing, numeracy, fine, gross motor skills, life skills).

We focus on your child's self-discovery journey as much as the results. What we offer is a holistic education that incorporates the best elements of research-based and evidence-informed pedagogies to create a child-led, play-based and project-based curriculum. Little ones will be imbued with values, knowledge and skills to be the Changemakers they were meant to be.

Little CEO

Leadership and teamwork, executive function and task management, confidence and public speaking

Become the most admired CEO of tomorrow. Your child's problem-solving and leadership skills will be unlocked. Your child will practise empathy and cooperation as they lead their team through a project. They will hone their decision-making skills as they gather opinions from their classmates, and build confidence as they practice public speaking.

Little CREATIVE

Experimenting, creative expression, art and music appreciation

Our Little Creative projects are designed to ignite your child's innate imaginative spirit and creative spark, through embracing and experiencing music, movement, communications and the arts. Immersed in the arts, children take risks, challenge conformity and expresses thoughts freely and making meaning of the world.

Little ENGINEER

Logical reasoning, design thinking, basics of coding, engineering and robotics

Our Little Engineer projects provide pathways to unlock your child's inventive spirit as they learn to tinker by deconstructing and rebuilding objects. Children will explore the fundamentals of how things work, such as elements of coding and physics as they engage in designing and creating innovative products.

Little PHILANTHROPIST

Values-based social responsibility, environmental consciousness, giving back and helping others

Beyond "What will I be when I grow up?" - our Little Philanthropist projects are designed to help your child question and discover "What can I do to make the world a better place?" Your child will be encouraged to help others; learn about giving back to society through volunteer and fundraising projects and visiting old age homes and hospitals, participating in charities. Little ones will begin their journey as a global citizen, creating the change they want to see.

Little ENTREPRENEUR

Creative thinking, problem solving, entrepreneurial skills and idea selling

Become tomorrow's changemaker by being the first to see a problem, finding the right solution, creating a game-changing idea, product or service and bringing it to market. Your child will pitch their idea, tell the story of the problem it solves and mobilize their classmates to bring the idea to life by delegating individual tasks and action lists, instilling and encouraging creativity.

Little CHEF

Developing healthy habits, nutrition, practical life skills and cultural appreciation

Discover the art, science and culture behind the disciplines of culinary and hospitality in our Little Chef projects. Your child will grow and harvest food, embrace the farm-to-table approach, prepare and serve nutritional meals, practise food safety awareness and foster healthy eating habits.
